

VCH ImmsBC – System Updates – June 19, 2024

There are a number of updates that went live this morning in ImmsBC:

1. **Ability to Defer and Save Another Vaccine**
2. **Ability to View Deferred Immunization Records in Related Tab**
3. **Immunization Records Set to “Cancelled” When Deferred**
4. **Descriptive Text Added to CIR “Time of Administration” Field**

Ability to Defer and Save Another Vaccine

What’s New?

Previously, there were limitations requiring a prescribed workaround to support ImmsBC users in recording multiple vaccinations including a deferral for a client visit.

With this enhancement, the inclusion of a “Defer Vaccination & Record Another Vaccine” button, ImmsBC users may now record deferred and/or administered vaccines during a clients appointment without worrying about a specific entry order. When “Defer” is selected at the point of Consent-taking and an ImmsBC user enters a Deferral, the green buttons at the bottom of the Vaccine Administration chevron in In-Clinic Experience will change to “Defer Vaccination & Record Another Vaccine” and “Defer Vaccination & Save”. Either may be used, depending on the nature of the clinical scenario.

| Agent | Reason for Deferral | Effective From | Effective To | View/Edit |
|----------------|--------------------------------|----------------|--------------|---------------------------|
| COVID-19 mRNA | Client/Parent/Guardian Request | 2024-06-14 | 2024-06-15 | View/Edit |
| Influenza-LAIV | Client/Parent/Guardian Request | 2024-06-12 | 2024-06-13 | View/Edit |

Ability to View Deferred Immunization Records in Related Tab

What's New?

There is a new check box located on the header of the Immunization Records section of the Related tab. It will default to “unchecked”, so only those Immunization Records without a “Cancelled” status show up.

Details **Related** Vaccine Scheduling Minor Ailments And Contrac...

 **Immunization Records (2)** Show Cancelled [Create Immunization Record](#)

| <input type="checkbox"/> Immunization Record | Agent | Date/Time of Submission | Pathway Status | Action |
|--|---------------|-----------------------------|----------------|--|
| <input type="checkbox"/> 18570332 | Pneumo-P-23 | Jun 14, 2024, 12:00:00 a.m. | After Care | Go to In-Clinic Experience |
| <input type="checkbox"/> 18570328 | COVID-19 mRNA | Jun 14, 2024, 03:46:05 p.m. | After Care | Go to In-Clinic Experience |

However, if a user would like to view Immunization Records with a Pathway Status of “Cancelled” (such as in the case of a Deferred Immunization Record), then a user may “check” the box next to “Show Cancelled”.

Immunization Records (4) Show Cancelled [Create Immunization Record](#)

| <input type="checkbox"/> Immunization Record | Agent | Date/Time of Submission | Pathway Status | Action |
|--|---------------|-----------------------------|----------------|--|
| <input type="checkbox"/> 18570332 | Pneumo-P-23 | Jun 14, 2024, 12:00:00 a.m. | After Care | Go to In-Clinic Experience |
| <input type="checkbox"/> 18570331 | | | Cancelled | Go to In-Clinic Experience |
| <input type="checkbox"/> 18570329 | | | Cancelled | Go to In-Clinic Experience |
| <input type="checkbox"/> 18570328 | COVID-19 mRNA | Jun 14, 2024, 03:46:05 p.m. | After Care | Go to In-Clinic Experience |

These Immunization Records will be blank, with no clinical data contained within. This is intentional, since when a deferral is created, it's the "shell" record being filled automatically flipped to this new status.

Immunization Records Set to "Cancelled" When Deferred

What's New?

Historically, deferral of immunization records in In-Clinic Experience would require manual clean-up of the "Appointment Status" while leaving a "shell" Immunization Record with a pathway status of "Vaccine Administration". The Appointment Status was manually changed from "Confirmed" to "Deferred" in order to unblock clients from booking future appointments.

With this enhancement, deferrals logged in In-Clinic Experience will show:

- Immunization Record Pathway Status of "Cancelled"

There will no longer be "Deferred" Appointment Status option. This is being replaced with "Cancelled" as described above.

Once the deferral is logged in the Vaccine Administration chevron in In-Clinic Experience, the following may be observed when reviewing the Related tab within a client's ImmsBC Profile:

- A new grid row entry under Client Profile >> Related tab >> Deferral section

| Deferrals (1) New | | | |
|--|----------------|--------------------------------|----------------|
| Deferral Name | Agent | Reason for Deferral | Effective From |
| D-36743 | Influenza-LAIV | Client/Parent/Guardian Request | 2024-06-12 |
| View All | | | |

- A new grid row entry under Client Profile >> Related tab >> Appointments section
- After selecting the "Show Cancelled" checkbox in the header of the Client Profile >> Related tab >> Immunization Records section, a user may select an Immunization Record number to view more detail

ImmsBC Notes (0)

Descriptive Text Added to CIR “Time of Administration” Field

What’s New?

ImmsBC user feedback identified difficulty identifying the correct Time of Administration entry format to successfully start the process for CIR entry.

There is now a descriptive field overlaying the “Time of Administration” field entry box, to assist users in entering time values in the correct format.

What Immunization do you want to record?

Pharmacy users: do not record vaccine administration without an appointment.
A PharmaNet billing claim will not be submitted
