

## VCH Imms BC – System Updates – Nov 14<sup>th</sup>, 2024

Enhancements below will impact VCH in-clinic users responsible for vaccine administration and data remediation, reporting and inventory management.

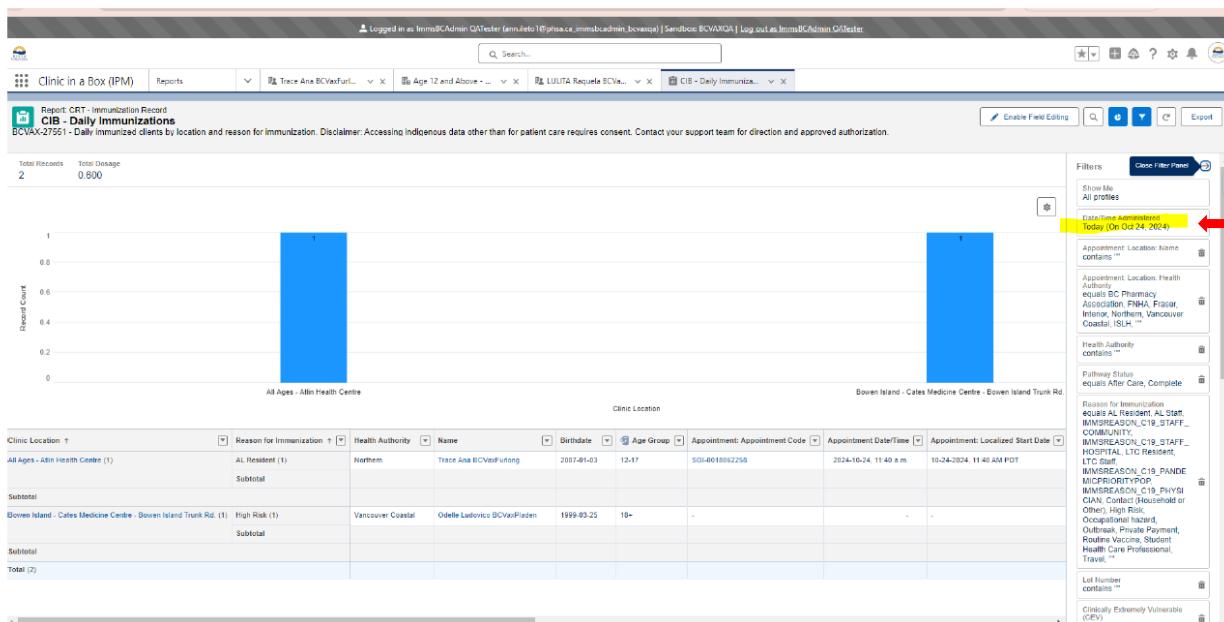

Changes anticipated for Imms BC include:

1. RPT - Update Time filter on CIB - Daily Immunizations report
2. RPT - Add Age column to Reg by CHSA report
3. Ability to sort Relevant Immunization History

### \* RPT - Update Time filter on CIB - Daily Immunizations report

#### What's New?

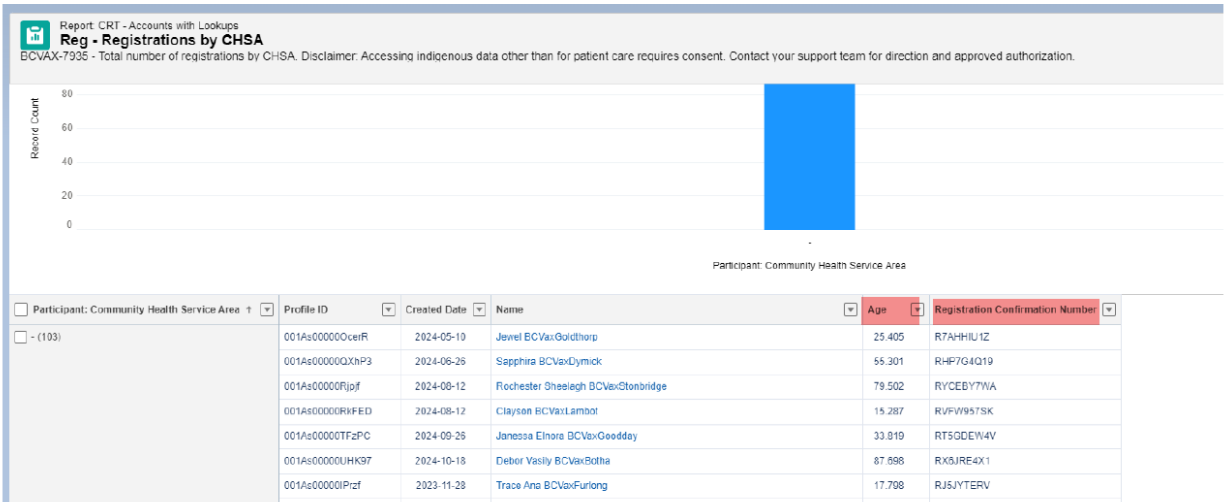

This change will update the 'Date/Time Administered' filter to 'Today' on the CIB – Daily Imms Report to reduce load time and time outs.

## \* RPT - Add Age column to Reg by CHSA report

### What's New?

This change will allow for a report that shows CHSA, and Client Age. The Age column will be viewable when the 'Details Row' is toggled to 'on'.

## \* Ability to sort Relevant Immunization History

### What's New?

This change will enable users to go into the Related Tab on the Client Profile and sort the 'Relevant Immunization History' columns: Agent, Trade Name, Status, or Date Administered in ascending and descending order by clicking on upward or downward arrow button in each column header. The ability to sort through the immunization history allows for more clarity, review of chronological history and decreases the incidence of duplicate and invalid client records.

**Relevant Immunization History (39)**

<input type="checkbox"/> Agent ↑	Trade Name	Dosage	Date Administered	Status
<input type="checkbox"/> COVID-19 mRNA	SPIKEVAX original strain (Mo...	0.5	2022-06-03	Invalid
